4. Service & Pricing Setup

Service Categories for the Quote Request Form-

Mozini Designs does not display fixed prices or pre-set packages on the website. Every project is treated as unique: items, quantities, and services are curated in real time based on the client's brief, and many products are imported, meaning costs depend on current supplier pricing, exchange rates, shipping, and lead times at the point of sourcing. Rather than a price list, the site presents a Request a Quote form, through which clients describe their requirements and receive a tailored quotation.
